C 3. 164: 930-I/960/7

U.S. DEPARTMENT OF COMMERCE Frederick H. Mueller, Secretary

UNITED STATES FOREIGN TRADE

SUMMARY REPORT FT 930-I

JULY 1960

IMPORT TRADE BY COMMODITY

The Bureau of the Census, Department of Commerce, announced today that the decrease in United States imports for consumption from \$1,295.6 million in June to \$1,144.8 million in July, a decrease of about 12 percent, reflected decreases in imports of all of the economic classes of commodities. The July 1960 imports for consumption total was about seven percent less than the July 1959 total of \$1,235.9 million.

The Bureau pointed out that for the first seven months of 1960, total imports for consumption amounted to \$8,757.0 million, an increase of about three percent over the total of \$8,543.1 million reported for the corresponding period of 1959.

Imports of <u>crude materials</u> dropped from \$281.8 million in June to \$236.5 million in July, owing chiefly to a sizable decrease in imports of crude petroleum from \$87.0 to \$63.5 million and to lesser decreases in imports of copper, from \$6.9 to \$2.1 million, and iron ore and concentrates, from \$40.0

to \$35.8 million. The decrease in imports of finished manufactures from \$451.4 to \$417.4 million reflected decreases in imports of most of the individual commodities included in this economic class. The more noticeable of these were: newsprint, from \$60.5 to \$52.9 million; steel mill products, from \$24.1 to \$17.9 million; and automobiles and parts, from \$49.6 to \$45.6 million. Imports of semimanufactures fell from \$269.2 to \$228.3 million reflecting in part declines in imports of gas and fuel oil, from \$37.4 to \$30.8 million; tin, from \$9.2 to \$4.8 million; wood pulp, from \$27.1 to \$22.7 million; copper, from \$26.5 to \$23.3 million; and zinc, from \$3.8 to \$0.8 million.

Lower levels of imports of cocoa, from \$17.4 to \$10.7 million; coffee, from \$84.3 to \$77.9 million; and bananas, from \$8.9 to \$5.9 million accounted for the bulk of the decrease in imports of crude foodstuffs from \$152.6 to \$127.4 million. Imports of manufactured foodstuffs dropped slightly from \$140.6 to \$135.3 million.

EXPLANATION OF STATISTICS

COVERAGE: Import statistics include merchandise imported by government agencies as well as by private importers, but exclude American goods returned by the United States armed forces for their own use. United States trade with Puerto Rico and United States possessions is not included in this report, but the import trade of Puerto Rico with foreign countries is included as a part of the United States import trade. Merchandise shipped intransit through the United States between foreign countries is not included in import statistics.

VALUATION: Import values are, in general, based on market price or selling price, and are, in general, f.o.b. the exporting country. Import values also exclude United States import duties. None of the values have been adjusted for changes in price level.

EFFECT OF SAMPLING: Formal entry shipments valued less than \$100 and informal entry shipments valued \$250 or less (less than one percent of total import value) are estimated by sampling. These estimated values are shown in the tables of this report as "Estimated value \$1-\$99 formal and \$1-\$250 informal entry shipments" and are arbitrarily included in the total for "Finished manufactures." The largest variation from rounding of figures is \$50,000.

Further information regarding coverage, valuation, etc., is contained in the "General Explanation" in foreword of Report No. FT 110. For complete statement, see the foreword in Foreign Commerce and Navigation of the United States.

Prepored in the Bureau of the Census, Foreign Trade Division

UNITED STATES IMPORTS FOR CONSUMPTION OF MERCHANDISE, BY ECONOMIC CLASSES AND LEADING COMMODITIES: JULY 1960 AND SELECTED PERIODS

(Quantity in units indicated; value in millions of dollars. Imports for consumption are a total of imports for immediate consumption plus withdrawals for consumption from bonded warehouses. Figures for 1960 are as originally issued and have not been revised to include published corrections. Figures for 1959 include revisions published with the December 1959 reports, or earlier, but do not include revisions published during 1960. Totals represent sum of unrounded figures, hence may vary slightly from sum of rounded amounts. See the "Explanation of Statistics" for information on sampling procedures.)
